About Mary Ann Liebert, Inc.
Founded in 1980, Mary Ann Liebert, Inc. is universally acknowledged for publishing authoritative peer-reviewed journals, books, and trade magazines in the most promising areas of biotechnology, biomedical research/life sciences, clinical medicine and surgery, alternative and complementary medicine, law, philanthropy, environmental science and sustainability.

About Our Collection
A valuable addition to any library, our publications emphasize cutting-edge research and technologies in the following disciplines:

- Biomedical Research/Life Sciences
- Biotechnology
- Clinical Medicine/Surgery
- Complementary/Alternative Medicine
- Engineering/Informatics
- Environmental Studies
- Law
- Lifestyle
- Philanthropy
- Psychology
- Public Health/Policy

Our Commitment to Service
As an independent, family-owned company, we are committed to working closely with librarians to customize a collection which meets the specific research needs of your community, and provides excellent value. We strive to provide a customer service which truly serves librarians and end users.

Site Licensing
A Liebert Online site license has library-friendly terms and conditions that allows unlimited, simultaneous access to up-to-the-minute research and development in a fully searchable PDF format, and guarantees perpetual access, with archival preservation guaranteed by Portico.

Available for all institution types including but not limited to:

- Academic Libraries
- Corporations
- Consortia
- Government and Public Libraries
- Hospitals
- Non-profit Organizations

Libraries interested in receiving a quote for one of these custom collection of content should visit www.liebertpub.com/packages and complete the online form provided or email online@liebertpub.com

To receive a quote for a single site or multi-site license for our full collection, a customized e-journal collection or one of our specialized collections, please email online@liebertpub.com

Praise For Mary Ann Liebert’s Consortium Deals:
“The 100+ schools of the Carolina Consortium can choose to participate in any of dozens of different consortium deals, including large journal packages from nearly all the major academic publishers. Interestingly, the Mary Ann Liebert deal has proven to be by far our most popular deal, with participation levels that are twice as high as those of larger and better known publishers. I attribute the popularity of our Mary Ann Liebert deal to their quality content, reasonable prices, flexibility, and positive attitude towards working with our consortium”.
— Tim Bucknall, Founder and Convener of the Carolina Consortium

JOURNALS

AIDS Patient Care and STDs
Included in the Brandon/Hill Library list of recommended medical journals. Publishes up-to-the-minute news and developments on HIV/AIDS clinical trials, medications and therapies, challenges of medication adherence, controversies associated with HIV testing, education, and prevention. Indexed in MEDLINE, Current Contents, and all key indexing services.

AIDS Research and Human Retroviruses
This peer-reviewed journal contains cutting-edge research on human retroviruses and their associated diseases. Researchers and clinicians are provided with the broadest coverage from molecular biology to clinical trials and outcomes research. The Official Journal of the International Retrovirology Association. Indexed in MEDLINE, Current Contents, and all key indexing services.

Alternative and Complementary Therapies
This practical, clinical publication offers healthcare professionals comprehensive coverage of CAM and integrative medicine, including botanicals, vitamins and supplements, acupuncture and Chinese medicine, homeopathy, mind-body medicine, yoga, massage therapy, and other complementary therapies. Profiles of innovative programs and leading clinicians are provided to keep experts up-to-date when evaluating and integrating alternative therapies into a clinical practice. Indexed in EMBASE/Excerpta Medica, CINAHL database and International Pharmaceutical Abstracts.

Antioxidants & Redox Signaling
This high impact factor, peer-reviewed journal is dedicated to the understanding of how oxygen and oxidation-reduction (redox) processes regulate biological signal transduction and gene expression, and how free radicals may be used for therapeutic purposes. Covers the role of antioxidants in human health, aging, and disease. Includes timely thematic forum issues. Indexed in MEDLINE, Current Contents, and all key indexing services.

ASSAY and Drug Development Technologies
This peer-reviewed journal presents unparalleled coverage of cutting-edge early-stage screening techniques, tools, and applications that optimize the identification of novel leads and targets for new drug development. Topics include: assay design and target development; lab automation and sample management; bioinformatics, data mining, and virtual screening; biosensors and detection technologies; metabolically engineered cells and organisms; imaging technologies for live cells, tissues, and small animals. Indexed in EMBASE/Excerpta Medica, CINAHL database and all key indexing services.

Astrobiology
Astrobiology is the authoritative peer-reviewed international journal created as a forum for scientists seeking to advance our understanding of life's origin, evolution, and distribution in the universe. Astrobiology brings together researchers through the dissemination of original research, hypothesis, education papers, and reviews, plus special reports and abstracts from the NASA Astrobiology Institute. Indexed in MEDLINE, Current Contents, GeoRef, and all key indexing services.

Bariatric Nursing and Surgical Patient Care
There has been an exponential growth in the number of bariatric surgical procedures, including gastric surgery and banding, due to patient demand and the recognition that surgical intervention is the most effective treatment for morbid obesity. This peer-reviewed journal provides cutting-edge research, clinical protocols, and practical tools to provide optimal care for patients. Each issue includes original papers, clinical reviews, profiles of successful bariatric surgical programs, case reports and covers patient and caregiver safety, pre- and post-surgical protocols, and dietary and lifestyle modifications. The Official Journal of the National Association of Bariatric Nurses. Indexed in Current Contents, Science Citation Index Expanded and CINAHL database.

Biosecurity and Bioterrorism: Biodefense Strategy, Practice, and Science
This multidisciplinary, peer-reviewed journal provides an international forum for debate and exploration of the many key strategic, scientific, and operational issues posed by biological weapons and bioterrorism. The Journal is of interest to individuals with strategic, management, scientific, or operational responsibilities in national security, medicine, public health, law, bioscientific research, agriculture and food safety, drug and vaccine development, the media, and local government. Indexed in MEDLINE, Current Contents, and all key indexing services.
**Biotechnology Law Report**

An essential reference source for attorneys, regulatory professionals, researchers, and information specialists. The leading journal dedicated to authoritative, up-to-date information on patents, technology transfer, regulatory, and bioethical decisions providing expert analysis and in-depth articles by leading international experts on the legal issues affecting biotechnology and its development. Produced in cooperation with California Western School of Law and available on Westlaw and LexisNexis. Indexed in Biotechnology Citation Index, Science Citation Index Expanded, Journal Citation Reports/Science Edition, BioBusiness, EM Biology, Scopus, CAB Abstracts, and BioCommerce Abstracts.

**Breastfeeding Medicine**

This peer-reviewed medical journal provides physicians with evidence-based information needed to better understand the complexities and benefits of breastfeeding to the mother and infant. The Journal covers a wide range of lactation medicine topics including: epidemiologic and physiologic benefits; breastfeeding protocols, health risks of artificial feeding; impact on physical and psychological health; indications and contraindications; use of medications by the breastfeeding mother; creating a baby-friendly hospital; plus social, cultural, and economic issues. The Official Journal of the Academy of Breastfeeding Medicine. Indexed in MEDLINE and EMBASE/Excerpta Medica.

**Cancer Biotherapy & Radiopharmaceuticals**

An authoritative, peer-reviewed journal covering cutting-edge research and clinical practice in cancer biotherapy, radiopharmaceuticals, and the latest developments in cancer treatments—including more selective delivery of drugs, biologicals, radiopharmaceuticals, and advances in instrumentation and technology, with the goal of increasing efficacy and decreasing toxicity. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Cell Preservation Technology**

The only journal dedicated to the diverse spectrum of biological preservation technologies—including cryo-preservation, dry-state (anhydrobiosis), glassy-state and hyperthermic maintenance—critical to progress in the biomedical sciences and ensuring cell quality and longevity. This indispensable, research lab journal provides a platform supportive of biomedical, biotechnological, and pharmaceutical interests utilizing bioprocessing, cell and molecular biology, cell and reproductive therapies, regenerative medicine, tissue engineering, and transplant medicine. The Official Journal of the International Society for Biological and Environmental Repositories (ISBER). Indexed in Biotechnology Citation Index, Science Citation Index Expanded, and EMBASE/Excerpta Medica.

**Cloning and Stem Cells**

A high-impact peer-reviewed, journal focusing on the latest coverage of mammalian cloning and stem cell research. Papers cover all aspects of cloning along with the culture and differentiation of stem cells from all stages of development from embryo to adult. Cutting-edge topics include germline genetic engineering, nuclear transfer in fish, stems cells from cloned embryos, and more. Indexed in MEDLINE, Biotechnology Citation Index, and all key indexing services.

**Current Controversies in Science and Technology**

This new online peer-reviewed journal is an informative and engaging exploration and analysis of some of the most important—and controversial—issues of our time, including biofuels, nanotechnology, stem cells, global warming, gender and biology, food safety, and much more.

**CyberPsychology & Behavior**

This bimonthly, peer-reviewed journal explores the psychological and social issues surrounding the Internet and interactive technologies. The Journal covers demographics of Internet users, social isolation, neuropsychological effects of multimedia, e-commerce, Internet addiction, long-distance learning, and many other current issues. Indexed in MEDLINE, Current Contents, and PsyCINFO.

**Diabetes Technology & Therapeutics**

This cutting-edge journal presents the latest developments in new devices, drug delivery systems, and therapeutics for the diagnosis, monitoring, treatment, and prevention of diabetes. The Journal provides practical information for clinicians and promotes communication between developers and users of new technology and products, such as continuous glucose monitor, inhaled insulin, and the artificial pancreas. Indexed in MEDLINE, Current Contents, and CINAHL database.

**DNA and Cell Biology**

This authoritative journal publishes innovative research in gene regulation. Among the topics covered are gene structure, molecular and cellular biology, and function and regulation; molecular medicine; gene delivery systems; and immunology research. The Journal features invited reviews as well as special issues focused on critical topics and breakthroughs in molecular research and laboratory methods. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Ecopsychology**

The new peer-reviewed journal Ecopsychology will explore the ways in which the environment and ecological issues affect and are impacted by psychology and mental health. The Journal will address on an individual, societal, and global level, the psychological, mental health, spiritual, and therapeutic aspects of Man’s concern and responsibility for protecting the environment. Its contents will address topics such as how to balance environmental and sustainability concerns with lifestyle choices, and religious, societal, and cultural practices.

**Election Law Journal : Rules, Politics, and Policy**

The only law journal devoted to the growing specialty of election law for practicing attorneys, election administrators, political professionals, and legal scholars in the U.S. and internationally. In-depth coverage includes litigation in the areas of voting rights, redistricting, election monitoring, contested elections, new election technology, political parties, ballot access, the initiative process, and campaign finance and reform on the federal, state, and local levels in the U.S. and 75 countries around the world. Available on Westlaw.

**Environmental Engineering Science**

An essential peer-reviewed journal providing innovative solutions to environmental challenges. The Journal provides a venue for rapid publication of papers on the development and application of fundamental principles toward solving environmental problems in land, air, water, and contamination, and waste disposal, including applications of the basic sciences. Indexed in Current Contents, EMBASE/Excerpta Medica, EI Compendex, Chemical Abstracts, and the NIOSHTIC database.

**Environmental Justice**

This new authoritative peer-reviewed journal explores the adverse and disparate environmental burdens impacting marginalized populations. Environmental Justice is the central forum for issues including the development, implementation, and enforcement of environmental laws, regulations, and policies. The Journal addresses the growing legal challenges as more attention and social responsibility is directed toward redressing inequitable environmental practices and hazards that threaten and adversely affect the health and well being of minority and low-income populations. Indexed in CAB Abstracts and GreenFILE.

**Foodborne Pathogens and Disease**

This peer-reviewed, international journal publishes the most cutting-edge information on global food, animal, and plant safety including original papers and short communications on research and diseases caused by foodborne pathogens. Leading food safety experts discuss topics on emerging pathogens; agroterrorism; the safety of organically grown and genetically modified foods; strategies to rapidly detect, destroy, or control foodborne pathogens in food production and processing; and novel strategies for the prevention and control of plant and animal diseases that impact food safety. Indexed in MEDLINE, Current Contents and EMBiology.

**Gaming Law Review and Economics**

The only law journal that delivers the latest developments in legislative, regulatory, and judicial decisions affecting land-based, Internet, and wireless gaming at both the state and federal levels in the U.S. and more than 75 countries. Features the full text of landmark cases and analysis of major cases, and covers the legal aspects of various facets of gaming and wagering, constitutional, corporate, employment, international, tax, accounting, and Native American law. The Official Legal Publication of the International Masters of Gaming Law (IMG). Available on Westlaw.

**Mary Ann Liebert, Inc.**

914-740-2100  toll free: 800-654-3237  www.liebertpub.com
The only multidisciplinary peer-reviewed journal that covers basic and clinical research about biopharmaceuticals that have the potential to prevent, treat, and/or diagnose ocular diseases and disorders. Topics covered include glaucoma, cataracts, ocular drug delivery, gene therapy, and more. The Official Journal of the Association for Ocular Pharmacology and Therapeutics. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Journal of Ocular Pharmacology and Therapeutics**

This authoritative, peer-reviewed journal publishes the most up-to-date clinical and research papers covering the full spectrum of health issues affecting women including internal medicine, cardiology, endocrinology, psychiatry, cancer, and OB/GYN. *Journal of Women’s Health* is a multidisciplinary, core resource that presents the latest advancements on new diagnostic and therapeutic procedures, and innovative research in gender-based biology. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Journal of Women’s Health**

This peer-reviewed journal provides an interdisciplinary forum for the world’s leading biomedical investigators studying lymphatic biology and pathology. The Journal publishes state-of-the-art reviews on vasculogenesis and angiogenesis, the genetics of lymphatic disorders, muscle cell biology, and interstitial signaling mechanisms. Original work emanates from a variety of investigative disciplines, including genetics, biochemistry and biophysics, cellular and molecular biology, physiology and pharmacology, anatomy, developmental biology, and pathology. The Official Journal of the Lymphatic Research Foundation. Indexed in MEDLINE, Biological Abstracts, and EMBASE/Excerpta Medica.

**Lymphatic Research and Biology**

A peer-reviewed quarterly journal written for physicians, by physicians. The Journal presents authoritative, evidence-based clinical papers, case reports, and research findings that integrate concepts from traditional and modern forms of acupuncture with Western medical training. This multidisciplinary publication covers the efficacy and safety of acupuncture in pain relief, cancer, stroke, pulmonology, urology, OB/GYN, gastroenterology, and much more. The Official Journal of the American Academy of Medical Acupuncture. Indexed in MEDLINE, Current Contents, and CINAHL database.

**Medical Acupuncture**

This timely journal provides in-depth exploration of the cluster of conditions associated with disorders including central obesity, type 2 diabetes, insulin resistance, glucose intolerance, hypertension, cardiovascular disease, dyslipidemia, prothrombotic and pro-inflammatory states, endothelial dysfunction, and polycystic ovarian syndrome (PCOS). Indexed in MEDLINE, Biological Abstracts, and EMBASE/Excerpta Medica.

**Metabolic Syndrome and Related Disorders**

This highly rated international journal provides a multidisciplinary forum for peer-reviewed original papers covering the mechanisms of antibiotic resistance, the molecular epidemiology of drug-resistant pathogens, and the impact of resistance on disease and chemotherapy. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Microbial Drug Resistance**

The only practical, clinical peer-reviewed journal that provides physicians, dietitians, and other healthcare providers with effective management options, office tools, and strategies essential in managing the overweight patient. Leading obesity experts deliver action-oriented content, including cutting-edge papers and interviews highlighting the clinical implications of recent obesity research, practical tools, and strategies for prevention. The Official Journal of C.O.R.E. (Centers for Obesity Research and Education), each issue contains news and literature reviews, clinical Q&A, tools and patient information, and reviews of weight loss programs and products. Indexed in EMBASE/Excerpta Medica, and Scopus.

**Obesity Management**

A peer-reviewed journal on natural or synthetic nucleic acid-based compounds such as oligonucleotides, RNA, ribozymes, RNAi, and aptamers and their biologic effects and applications both in vitro and in vivo. The only journal focusing solely on therapeutic oligonucleotides, while addressing drug development and application not only in the oligonucleotide field, but also in areas such as immune modulation or target validation. The Official Journal of the Oligonucleotide Therapeutics Society, Inc. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Online Only!**

This peer-reviewed journal covers genomics (RNA and gene expression), transcriptomics, proteomics (protein expression), glycomics (glycobiology focused proteomics), and metabolomics (metabolites and metabolic networks). The Journal explores advances in the era of post-genomic biology and medicine, including pharmacogenomics and phsyomics. Integrative, quantitative, experimental, and computational approaches are bringing new knowledge, novel methods, and innovative technologies to engender a better understanding of complex biological systems and processes. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Pediatric Asthma, Allergy & Immunology**

Provides access to the best and most recent clinical information and recommendations for managing pediatric asthma, allergies, and immunology as a specific area of medical specialization. The safety and efficacy of asthma and allergy medications are explored, as are food allergies and drug hypersensitivities. Indexed in Biological Abstracts, EMBASE/Excerpta Medica, and CINAHL database.

**Photomedicine and Laser Surgery**

This peer-reviewed journal provides rapid publication of cutting-edge techniques and technology in phototherapy, low-level laser therapy (LLLT), and laser medicine and surgery including clinical research, expanded applications and safety, new instrumentation, optical diagnostics, and the broad range of activities related to the understanding and applications of biophotonics in medicine. The Official Journal of the World Association for Laser Therapy (WALT) and North American Association for Laser Therapy (NAALT). Indexed in MEDLINE, Current Contents, and all key indexing services.

**Population Health Management (formerly Disease Management)**

The new title of this authoritative peer-reviewed journal reflects the expanding scope of health care management and quality. The Journal delivers a comprehensive, integrated approach to the field of population health and provides information designed to improve the systems and policies that affect health care quality, access, and outcomes, and quality of life. Each issue includes original research papers and case studies on the practical aspects of developing and implementing disease management initiatives, as well as perspectives and insights from leading professionals in the field. The Official Journal of the Disease Management Association of America. Indexed in MEDLINE, Current Contents, and CINAHL database.

**Rejuvenation Research**

A high-impact factor peer-reviewed journal focusing on all aspects of biology relevant to the potential extension of the healthy human lifespan, especially by interventions begun late in life, including stem cells, cloning, gene therapy, and tissue engineering. Sociopolitical and ethical issues relating to life extension are also covered. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Stem Cells and Development**

Noted for its provocative editorial content and balanced coverage of the therapeutic applications of stem cells, this peer-reviewed journal offers cutting-edge advances in this growing field. The Journal fosters investigations that propose new and novel mechanisms, with expanded coverage of embryonic development, wound healing, vascular development, organ development and repair, homeostasis and development of the hematopoietic system, neoplastic development, and much more. Indexed in MEDLINE, Current Contents, and all key indexing services.
**Surgical Infections**
The only surgical journal focused exclusively on the prevention and treatment of surgical infections and sepsis as well as the development of new pharmaceuticals and treatment modes. This international, peer-reviewed journal provides practicing surgeons, infectious disease specialists, transplant specialists, burn specialists, and critical care physicians with comprehensive data on the biology, prevention, and management of postoperative infections. The Official Journal of the Surgical Infection Society and Surgical Infection Society-Europe. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Zebrafish**
The only peer-reviewed journal focused on the zebrafish and other aquarium fish model species including medaka, Fugu, and Xiphophorus. The physical characteristics of these fish species make them ideal vertebrate models for studies of embryonic development, comparative genomics, evolution, toxicology, and other areas of research. Due to its favorable qualities, the zebrafish has become one of the most promising model species used for human disease related research that is supported by the National Institutes of Health. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Telemedicine and e-Health**
The leading peer-reviewed journal covering all aspects of clinical telemedicine practice, including technical advances, enabling technologies, education, health policy, and regulation, clinical efficacy and safety, implications for the future of health care, and cost and accessibility of care. Includes profiles of successful telemedicine programs, interviews with leaders in the field, and comprehensive news. The Official Journal of the American Telemedicine Association. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Thyroid**
An indispensable peer-reviewed journal that combines clinical information, cutting-edge original papers, and high-quality science in thyroid research. Each issue presents timely and basic clinical reviews, as well as lively correspondence reflecting the rapidly advancing changes in our understanding of thyroid genetics, physiology, and pathology, from the molecular biology of the cell to clinical management of thyroid disorders. The Official Journal of the American Thyroid Association. Indexed in MEDLINE, Current Contents, and all key indexing services.

**Vector-Borne and Zoonotic Diseases**
The first, authoritative peer-reviewed journal dedicated to diseases transmitted to humans by invertebrate and vertebrate animals. Covers a widespread group of diseases, including bacterial, chlamydial, rickettsial, viral, and parasitic zoonoses and provides a unique platform for basic and applied disease research. The Journal also examines geographic, seasonal, and other risk factors that influence the transmission, diagnosis, management, and prevention of zoonotic diseases. Indexed in MEDLINE, Current Contents, Wildlife Review Abstracts, and all key indexing services.
Advances in Preschool Psychopharmacology
This timely new publication provides psychiatrists, pediatricians, and other health care providers with an up-to-date resource to meet the challenges of treating preschool children with psychotropic medications. This volume balances concerns about risk with treatment outcomes and helps to answer the questions of if, when, and how to prescribe psychopharmacologic agents to preschool children.

Editors: Joan L. Luby, MD and Mark A. Riddle, MD

Pub Code: PSP
Print prices: US – $89
Outside US – $99

13 digit ISBN: 978-1-934854-03-7
10 digit ISBN: 1-934854-03-4

Botanical Medicine: From Bench to Bedside
Botanical Medicine: From Bench to Bedside provides a comprehensive overview and examples of the scientific and quality control issues related to pre-clinical and clinical trials of botanical preparations and dietary supplements. The book covers standardization approaches to characterizing the consistency of plant extracts; issues and challenges facing investigators in clinical trials, the MD practitioner’s perspective; and a foreword from Professor Norman Farnsworth, world renowned expert on pharmacognosy.

Editors: Raymond Cooper, PhD and Fredi Kronenberg, PhD

Pub Code: CLPH
Print prices: US – $109
Outside US – $129

13 digit ISBN: 978-1-934854-05-1
10 digit ISBN: 1-934854-05-0

Clinical Botanical Medicine, 2nd Edition, Revised and Expanded
Fully updated and expanded, this comprehensive book for clinicians presents updated practical information on a broad range of diseases and conditions for which botanical medicine is effective. Special attention is given to toxicity and drug-herb interactions to ensure that the clinician is fully informed about the safety and efficacy of each botanical.

Editors: Eric Yarnell, ND, Kathy Abascal, BS, JD, RH (AHG), and Robert Rountree, MD

Pub Code: CBM2
Print prices: US – $99
Outside US – $119

10 digit ISBN: 0-913113-46-8

Clinical Natural Medicine Handbook
Authoritative and comprehensive, the new Clinical Natural Medicine Handbook helps practicing clinicians understand and apply the latest advances in integrative medicine. With a unique combination of guidelines, protocols, and practice-oriented literature review, it provides virtually everything you’ll need to optimize your clinical use of nutrition, nutraceuticals, and botanicals. The Handbook includes over three dozen disease- or condition-specific chapters featuring in-depth information and insight on natural, nutritional, and botanical approaches to treatment and management.

Editors: Chris Meletis, ND, Nieske Zabriskie, ND, and Robert Rountree, MD

Pub Code: CNMH
Print prices: US – $99
Outside US – $110

13 digit ISBN: 978-0-913113-44-8
10 digit ISBN: 0-913113-44-4

Controversies in Science and Technology: From Climate to Chromosomes
This edition of Controversies in Science and Technology explores five of the most controversial scientific issues facing our world today. This collection of informative and engaging essays addresses Stem Cell Research, Information Technology, Space Exploration, Global Warming, and Biology and Gender. These issues challenge our beliefs about each other, our planet, societal fairness, the concept of “knowing,” and the definition of human life itself—these issues reach into our minds, hearts, and souls. Before making judgments and decisions that affect society we must first empower ourselves with all the knowledge and facts available. A text of choice for course adoption to stimulate classroom discussion.

Editors: Daniel Lee Kleinman, PhD, Karen A. Cloud-Hansen, PhD, Christina Matta, PhD, and Jo Handelsman, PhD

Pub Code: CISAT
Print prices: US – $75
Outside US – $75

History of Telemedicine

History of Telemedicine provides an in-depth historical overview on the foundation and evolution of the field of telemedicine. The book takes the original concept of telemedicine and explains its development and transformation, leading to the full spectrum of advances and applications in the field today. This book explores the early rationale for telemedicine, its coming of age, and the rapidly growing telemedicine initiatives across the country.

Internet Gaming Law, 2nd Edition, Revised and Expanded

This newly updated Edition has expanded coverage of the impact of state, federal, and international laws on traditional forms of online gambling, such as casinos, lotteries, bingo, and sports betting, as well as sweepstakes, games of skill, and day-trading. Internet Gaming Law examines the legal implications for gaming operators and players, regulators, advertisers, banks, and software developers.

Medication Adherence in HIV/AIDS

This book addresses the barriers to medication adherence in HIV/AIDS, including special problems faced by various segments of the population, including adolescents, minorities, the disabled, and drug users, and reviews a variety of solutions for overcoming this critical challenge. An invaluable resource for physicians, nurses, psychologists, pharmacists, social workers, and public health officials who work with HIV/AIDS patients.

Methods in Redox Signaling

A comprehensive handbook on the experimental methods to study redox signaling, which is involved in the pathobiology of various disease processes including cancer, cardiovascular diseases, wound healing, and many other degenerative diseases. Research on redox signaling has exploded in the last decade, and this volume, with over 40 chapters, is the most encyclopedic reference source available.

NORD Compendium of Rare Diseases

The fully-updated edition of the NORD Compendium of Rare Diseases is the most comprehensive and authoritative resource of its kind. From the National Organization for Rare Diseases, this compendium provides a wealth of quick-reference information and data on more than 1,000 rare diseases—from signs, symptoms, and etiology to support groups and researchers. The passage of the landmark Orphan Drug Act of 1983 has created heightened awareness of and interest in these rare conditions.

Mary Ann Liebert, Inc. is pleased to announce the launch of Liebert Online e-Books. Our e-Book platform will have full searchability, reference linking, fully printable pages and chapters, and our user-friendly 'PDF-plus' technology, ensuring rapid download times. No proprietary e-Book reader is needed, just Acrobat Reader! Our e-Books are fully integrated with our easy to use and navigate Liebert Online platform. More benefits include: a single point of administration for easy use, a single point of searching for readers, and the ability to purchase the entire book or just the chapters that you need. Finally, there is no complicated Digital Rights Management (DRM) to inhibit users.
